

20190046 권해찬 - Assignment 1-State Diagram

An input in the state transition diagram can be either:

1) a set of characters or 2) a single character

Here, we define **C** as **set of all valid characters**

Set operations are also used in this diagram.

e.g. $C \setminus \{*, \backslash n\}$ is the set of all valid characters excluding * and newline
